## In Memoriam.

## FREDERICK LOEBER, M. D.

Born at Geissen, Germany. Died, October 18th, 1901. Aged sixty-three years.

To the Board of Administrators:

Gentlemen-Your Memorial Committee would report that the death of Dr. Frederick Loeber, late an Administrator of the Hospital, can, in many respects, be regarded by his colleagues as a personal bereavement His assiduous attention to his duties a cordial manner and urbane bearing uniformly characterized his association with the Board. Of clear judgment, after calm reflection he brought to the settlement of difficult questions the poise of a reliant mind. His opinions were deferred to. Of his career as a physician, your Committee have but to point to the eulogies that have been passed upon his memory by the people eulogies that have been passed upon his death. and the press of this city, immediately following his death. stinted praise has been uttered, but by all who knew him he was regarded as a broad-minded, accomplished physician, who did much in elevating his profession to the high standard it enjoys. With a heart full of the milk of human kindness, he freely and with a heart tun of the nine of items of poor, suffering charitably ministered to the bodily afflictions of poor, suffering humanity, regardless of fee or reward, and on all occasions was

As a citizen, honorable and law-abiding, he was ever exemplar to others. As a husband and father, he was richly exemplar to others. As a massault that should surround the family circle, and in all relations of life he exhibited that strict adherence to duty which the career of such a man demands. view of his death, be it

Resolved, That in the demise of Dr. FREDERICK LOERER this Board has lost an esteemed and able colleague, whose interest in the work of this great charity ceased only with his life: be it

ner Resolved, That the Board extend its heart felt condolences

to his bereaved family; be it further

Resolved, That a copy of the preamble and these resolutions be transmitted to his family under seal, and be written at length Respectfully submitted,

E. S. LEWIS, M. D. J. D. BLOOM, M. D., HUNTER C. LEAKE

#### ANNUAL REPORT

OF THE

## BOARD OF ADMINISTRATORS OF THE CHARITY HOSPITAL

For the Year Ending December 31st, 1901.

CHARITY HOSPITAL,
STATE OF LOUISIANA,
NEW ORLEANS, February 3, 1902.

To His Excellency, W. W. Heard, Governor of the State of Louisiana, and President of the Charity Hospital Board of Administrators:

Your Excellency-The report of the Board for the year 1901 is respectfully submitted, with the reports of its officers and committees. The year's work has been satisfactory, and, notwithstanding increasing expenses, there remains a surplus of \$800.00 to be credited to the general fund of the current year. The disbursement has exceeded that of the preceding year by 87,837.48 owing to insurance policies paid; advance in price of provisions and fuel; the increase of the corps of trained nurses and improvements. There were 7725 admissions with 644 remaining over, making a total of 8369 treated during the year. Of this number 6640 were discharged and 1112 died. A death rate of 9 per cent., not including the moribund admitted. outdoor clinic report shows an increase over previous years, and the number of ambulance calls is the largest since the inauguration of the service. The improvements have been many and varied. They include general repairs. The substitution marble wainscoting for glass in the surgical amphitheatre. needed sanitary measure, imparting a more elegant finish the rooms and insuring more thorough asepsis. The purchase of a new hot water heater for the male department building and an additional filter with a capacity of 40,000 gallons per twentyfour hours. A new Worthington pump to supply tank with filtered water and a pipe threading machine for cutting and threading pipes from one to four inches in diameter.

The Milliken building has been renovated and improved by Mrs. Milliken, who generously incurred all expenses. Secretary's office and halls throughout the main building are now brilliantly illuminated with the Welsbach incandescent lights, a donation from Mr. Bankson Taylor of the Gas Light Co. Back of the amphitheatre a fountain now stands, formerly in Gallier's Court, a gift from the Jesuit Fathers. It is a beautiful ornament to the grounds and of considerable value. The erection of a Home for Nurses, at a cost of \$50,000.00, supplies a necessary want. It is nearly ready for occupation and is the gift of a philanthropist which marks an epoch in the history of this institution. It will increase the efficiency of the nursing service as the trained corps can now be enlarged and distributed to all the wards. The change is gladly welcomed by the medical and surgical staff and by the Board, who long ago recognized the need of reforming the system without the means to correct Very effective work has been done in the pathological department in the examination of pathological specimens and in bacteriological researches. A commission, of which Drs. Pothier and Couret, the pathologists of the Hospital were members, after numerous experiments demonstrated the role of the Sanarelli bacillus in the development of yellow fever and of its propagation by the mosquito. Details of the work done in this department are fully reported by Dr. Pothier. The pharmaceutical department, in charge of Mr. Taylor, is ably and economically administered. Chemicals hitherto purchased are now prepared in his laboratory at a material reduction of cost. The engineering department, of which Mr. Ponder is chief, has been greatly extended to meet the increasing wants in supplying heat and water and providing for sewerage in the various annexes, and too much praise cannot be accorded him for his extremely valuable services and the thoroughness of his work. School for Nurses has been enlarged and temporary accommodation provided. It is under the supervision of Miss Huyghe.

whose competency and qualities are of a high order. Our appreciation of the services of the corps is manifest in our desire to extend its sphere of usefulness. The economic administration of the Hospital, with the great responsibilities involved, in the general supervision of its inmates and the providing of material wants, is wisely administered by Sister Agnes and her corps of devoted and unselfish Sisters, to whom all pleasures are denied, save in the conscientious performance of duty. We tender them our sincere thanks. To the firm of Farrar, Kruttschnitt & Jonas we are under deep obligations, and especially to Mr. Kruttschnitt, who, at all times, has always courteously, cheerfully and promptly responded to our calls for advice and taken charge of all legal matters submitted to him without compensation. We take this opportunity to thank him and the members of his firm.

For donations and legacies received wherewith we enabled to improve and add to the usefulness of this great in stitution our grateful thanks are hereby rendered. Our sincere thanks are also extended to our distinguished House Surgeon and competent staff, Drs. Fenner and Batchelor, and to the Resident Students corps, who have attended to duty faithfully and well. To our Clerk, Mr. Leake, who is responsible for the proper keeping of the books which record the admissions, discharges and deaths, for the creditable and painstaking manner in which they are kept. To our able Secretary and Treasurer, Mr. Marks, for the satisfactory and conscientious performance of duty in his position of great trust. To the Medical and Surgical staff, who receive no compensation, and to all the employes in every department of the service.

To you, my colleagues and friends, who bear the onerous portion of the work, my grateful thanks are returned for valuable assistance, and for the interest and zeal displayed in all that pertains to the Hospital.

E. S. LEWIS, M. D., VICE PRESIDENT.

### Annual Report of the House Committee.

CHARITY HOSPITAL, STATE OF LOUISIANA, NEW ORLEANS, February 3, 1902.

To the Vice President and Board of Administrators:

Gentlemen—Your House Committee respectfully report the following resumé of material work on the Hospital buildings, improvements to the general service, etc., during the year 1901, viz:

A new hot water heater for the Male Department of the Main Building.

A steel tank for the Milliken Building Engine Room, for returning steam condensation from all buildings on the square to the boilers, creating a central distributing point for steam, and hot and cold water.

Complete renovation and repair of the "A. B. Miles Surgical Amphitheatre," removal of the former glass wainscoting in all the surgical rooms of the structure, and the substitution therefor of white marble, elaborately finished, and forming as perfect a piece of work as can be seen in any hospital in the country, and fully up to hygienic, antiseptic requirements.

A new hot water heater for the Female Department to supply one in use for the past twenty-six years.

The old Hyatt filter, in use twenty years, has been repaired, and, as an auxilary and to increase the indispensable desiderata of filtered water, a Bomarius filter of the latest pattern, with a capacity of 40,000 gallons of clear water in 24 hours, has been introduced, giving, with the three in use, an entire out-put of 90,000 gallons per day.

A new Worthington pump to supply tanks with filtered water.

A power threading machine for cutting and threading pipes of from one to four inches in diameter, which will prove labor saving and economical.

By the liberality of Bankson Taylor, Esq., manager of the New Orleans Lighting Company, lessees, all main points, such as corridors, etc., in the Hospital buildings, have been equipped with the Welsbach incandescent lights of full illuminating power.

We are further indebted to the Jesuit Fathers for the gift of a beautiful and highly ornamental fountain, which, for many years adorned the Gallier Court of this city. After being put in complete order by Chief Engineer Ponder, it has been placed in the court yard, contiguous to the Surgical Amphitheatre.

The Hospital buildings have been generally repainted, calcimined and repaired from time to time, thus keeping them up to a proper standard.

The Milliken Memorial Hospital, through the continued munificent generosity and untiring interest of Mrs. D. A. Milliken, has received additions and been rennovated, repainted etc., to the fullest degree. This philanthropic lady is continually adding to her princely donation of this original model Hospital building and its furnishing, and increasing the peoples debt of gratitude to her.

The yearly supplies of bread, meat, milk, coal and ice have been punctually delivered by contractors and have been found quite satisfactory.

In conclusion, your Committee would tender their special thanks to Chief Engineer Ponder for his unintermittent, intelligent services in his department, and which are always in the interest of economy and labor-saving.

Respectfully submitted,

JOHN T. GIBBONS, W. G. VINCENT, A. R. BROUSSEAU.

## Annual Report of the Finance Committee.

CHARITY HOSPITAL, STATE OF LOUISIANA, NEW ORLEANS, February 3, 1902.

To the Vice-President and Board of Administrators:

Gentlemen—Your Finance Committee respectfully report that the income of the Hospital for the past year has been sufficient to maintain it. This result has been brought about by the increased appropriation of five thousand (\$5000.00) dollars from the State, as compared with the previous year of 1900.

The auxiliary revenues, which the Hospital is entitled to collect, still continue to decrease; noticeably, auctioneers' returns and slaughterhouse fees.

The expenses for the year 1901—as compared with those of the previous year—show an increase of \$7837.48. The erection of the Nurses' Home, the philanthropic gift of one of our leading citizens, and costing \$50,000.00, will soon be in full operation. The support and maintenance of this institution for female trained nurses, will necessarily increase our expense account.

The statement of receipts and disbursements is shown in detail by the accompanying report of the Secretary and Treasurer.

Respectfully submitted,
R. E. CRAIG,
Chairman Finance Committee.
GEO. SEEMAN,
HUNTER C. LEAKE.

## Property of Charity Hospital.

#### DECEMBER 31, 1901.

#### REAL ESTATE.

Hospital Grounds and improvements.

Union Cotton Press, thirteen lots.

Cemeteries, two lots.

Batture Cotton Press property.

Ambulance Building, lots and improvements, fronting on Tulane avenue, opposite the Hospital.

Double frame cottage, Nos. 40 and 401 Villere street.

Entire square of ground contiguous to Main Hospital, bounded by Howard, Gravier, Magnolia streets and Tulane avenue.

Richard Milliken Memorial Hospital on above square.

Home for Female Trained Nurses on same square.

Real estate, East Carroll parish, near Lake Providence, La.

#### SUNDRIES.

Three Ambulances and equipments.

Twelve horses.

Hospital wagons, tally-ho and harness.

Surgical, electrical, microscopical and other instruments.

Furniture and household effects.

Library.

Greenery and hothouse.

#### ACKNOWLEDGED BY SISTER AGNES, 1901.

Mrs. B. Egan, iron bed.

Children of McDonogh No. 11, four baskets of Easter eggs and rabbits.

Lady of Greenville, Miss., large box of toys, dolls, scrap-books, etc.

Mrs. Bienvenue, jury mast for child.

Miss Lulu Lowry, St. Catherine's School, Bolivar, Tenn., lot of scrap pictures, dolls, etc., for children.

New Orleans City R. R. Co., entertainment for children, given by "Baby Lund."

United Fruit Co., Illinois Central Fruit Wharf, wagon load of bananas.

A. Lehmann, Canal st., two cases of samples.

Mr. A. Cordona, Jr., coop of chickens.

Mrs. Dubos, Burgundy st., case of Mellin's food.

Mrs. Behan, dolls for children.

Mrs. McCall, dolls for children.

Mrs. Serge, picture-books for children.

Mr. Williams, \$5.00.

A Friend, two dozen spring chickens and thirty dozen eggs.

Mrs. Krause, five sweeping brooms.

Mrs. Isadore Newman, one hundred fans for patients.

Mrs. A. W. Crandell, one gallon ice cream for children.

Fou Loy Fai & Co., 414 Chartres st., two and one-half chests of black tea.

P. J. Campbell, Ponchatoula, La., ten gallons of milk.

Miss Lilly Scooler, two boxes of choice candy for children.

Singer's Sewing Machine Co., three sewing machines.

Mr. R. E. Craig, two boxes oranges.

Mrs. Albert E. Williams, pretty story-books for children.

Mrs. K. S. Baysinger, pretty story-books for children.

Mr. Robert Maurin, Belle Alliance Plantation, one barrel of choice molasses.

Mr. A. Cardona, Jr., sack of choice rice, 100 lbs.

Rev. H. S. Maring, S. J., fountain for yard.

A Little Friend, city, six pretty story-books for children.

N. Bordroaux, Houma, La., sack of quinces.

Mrs. I. Scooler, toys and choice candy for children.

Mrs. N. Thiberge, one dozen costumed dolls,

Colgate Mfg. Co., two packages talcum powder.

Mrs. T. W. Gates and H. B. Waldron, Hammond, La., twelve packages select children's stories.

Tai Kee Co., Gretna, La., one chest tea.

Miss E. McKee, one bucket "cuite."

Mrs. Julia Lebermuth, 522 Walnut st., \$10.00 for children. Little David Manson. \$5.00 for children's Xmas Tree.

Mr. Stutte, \$250.00 for Xmas for children.

Mr. Stutte, \$215.00 for Xmas for children.

Miss Celeste Brittin, one bucket of candy for children.

Mr. R. E. Craig, two boxes of apples.

Children McDonogh No. 11, handsome assortment of dolls, nuts, fruits and candy.

Mrs. Isadore Newman, two boxes confections.

Mrs. M. Larue, twelve costumed dolls.

Mrs. Maurice Stern, toys, hose and handkerchiefs.

Messrs. Kottswitz & Co., two sacks of potatoes.

Messrs. D. J. Bennet & Co., one box of oranges.

Mr. R. E. Craig, two boxes of oranges.

Mrs. D. A. Milliken, Xmas tree and toys for children.

Miss Lillie Scooler, mechanical toys and candy.

Mrs. S. E. Turner, toys for children.

Mrs. O. L. Pothier, thirty pounds cream candy.

Mr. Herbert Ruch, two pigs.

Mrs. Curtis, two pigs.

Mr. John Garic, large sponge cake.

Messrs. Smith Bros., six turkeys.

Miss Alice Haas, flowers, fruit and confections for the children (weekly).

Mr. E. G. Stutte, 250 eigars for patients.

Mr. Owen Cahill, two turkeys.

Mrs. Eastwick and Pupils of McDonogh No. 1, handsome scrap-books, dolls, fruit and candy for the children's Christmas.

Mr. Mulvihill, Gravier st., city, two barrels potatoes.

D. O'Sullivan, Gilpin, Col., \$5.00.

A. A. Kaiser, city, \$5.00.

Geo. Dorr, Crowley, La., \$33.50.

C. B. Anderson, \$6.00.

F. Beahme, \$5.00.

A. Beatty, \$1.00.

A Friend, \$5.00.

E. Pfeffer, \$10.00.

A. S. Jargensen, \$3.00.

E. Casalie, \$5.00.

Patient in Ward 13, \$5.00.

A Friend, \$5.00.

Mrs. Tureman, infants' sacques, socks and toys.

## Annual Report of the House Surgeon.

CHARITY HOSPITAL,
STATE OF LOUISIANA,
NEW ORLEANS, February 3, 1902.

To the Board of Administrators:

Gentlemen—The tangible force of a public's interest and philanthropy significantly weigh proofs of the year's progress in pertinent strides to the ennobling of a medical work of scientific and humane charity. Commensurate to every active need, provision, equipment and demonstrable purpose of advancement, has been the entailed expenditures, and the full and helpful good of its doing will be more plainly evidenced in the year now advancing.

During the year that has passed, thirty-three thousand six hundred sick-poor sought refuge, comfort and relief within these premises. Of comparative note in a statistical showing the total admission numbering 7725, represents a slight proportionate increase in the number of whites admitted, namely, 4673, and a diminution in the colored, which was 3052.

Including the 644 remaining from the previous year, the total in-door patients that were cared for numbered 8369, a slight increase in its showing. The discharged of this number were 6640, which is comparatively larger than the year preceding and points to a shorter period of hospital stay.

Upon January 1, 1902, there remained in the institution 617 patients. The daily number in the average of the year was  $566\frac{1}{6}$ .

Of the patients admitted into the Hospital, 1112 died and of which 394 were admitted moribund, dying within 36 hours of

admission. In the hospital record of work this represents the largest list of moribund patients received. The Coroner viewed 178.

The record of hospital death rate, which has shown a reduction of two per cent. during the preceding six years, continues. The true death rate for the year was 9 per cent., and the total 13.

Attendance in the department of the Out-door Clinics show an increase of 2100 applicants for relief. Medical and surgical aid were given to a total of 21,164 new patients, and who required, further, 58,842 consultations for proper guidance in treatment.

The Clinics have been satisfactorily conducted. The Externe Students have exhibited great promptness and industry. The need of rearrangement by way of facilitating patients in waiting as well to the betterment of sanitary conditions, invites consideration.

Efficiency in the Corps of our Ambulance Service has served a mission work in the exemplary of mercy that has inspired a confidence in this institution. The commendable pride and industry of our Resident Student Corps have enhanced the benefits of our emergency aids and general hospital service. 1596 ambulance calls received a response by the corps in a time average of 32.6 minutes, the largest list of calls since the inauguration of the service.

The accident division of the A. B. Miles' Amphitheatre, in the summing up for the year, gives a record of 4075 cases, and which represents a marked increase in service. The emergency work has exceeded all previous records and gives strength to the educational purpose that this institution has shaped by humane facility and modern convenience, encouraging, as it does, the application for treatment in confidence and appreciation of its work. The Amphitheatre has been improved in its facilities by the introduction of marble wainscoting, water-tight floorlines, a battery of the most improved sterilizers and the enameling of its walls, giving in appointment an unexcelled service

in keeping with the requirements of surgical progress. Its water supply has been perfected, and under the guidance of a thermostat there is secured to every outlet of its several divisions a supply of cold and hot sterile water that has not suffered exposure to the atmosphere, and upon this and every material of surgical use, our Bacteriological Department reports as culture proof. This innovation makes useless one of the previously used cooling tanks, which can now be disposed of and the space fittingly arranged as a surgeon's dressing room. The surgical work proper of the Amphitheatre is represented in 1226 major surgical operations.

The Bacteriological and Pathological Department of our work grows in significance with each year's advancement and its guidance, upon which important results depend, will, with a greater monetary aid, redound to the pride of our Southern country. Investigation upon abstruse medical subjects, out of which can be evolved great human blessings, the possibilities of serum and animal therapy in their full and enlightening results. would be comfortingly assured. The department work, recited in the report accompanying, has been active in aiding medical and surgical work, in the confrontation proofs of asceptic surgical perfection, general water supply and matters of sanitary guidance. Special studies and experiments have been carried on in cancer and the department has contributed materially to the recent interesting investigation of the mosquito in relation to disease. The work in these particulars has been highly The intelligent and conscientious labor of the Pathologist, Dr. O. L. Pothier, and his assistant, Dr. M. Couret, is a pleasure to commend.

The room space for medical archives in the male division of the Out-door Clinics continues as a convenient aid for reference and study. Of the histories recorded during the year the Registrar reports a total of 1971, which includes medical, surgical and gynecological. The generous gift that has contributed in preparatory provision for the adjunct of a thoroughly modern and scientific nursing system throughout all divisions of the hospital service, was a gracious aid to the sick-poor and no less a compliment to Southern womanhood.

To your Medical Committee have been addressed the reports upon the satisfactory results and progress of the school, which, with the advantages to be soon enjoyed, in the enlarging of its scope and instruction, will contribute an additional pride to this institution's fame.

With the occupancy of the Nurses' Building, the space now devoted to their use will allow an increase of accommodation for surgical and gynecological patients and permit of a redistribution to this end. For this purpose the need of an elevator service in this building becomes essential, and your consideration of the matter is respectfully asked.

Chemistry and Pharmacy have become distinctly departmental under the direction of our Chemist, Mr. W. T. Taylor, and in hospital work and economy a significant factor. His industry and able direction have effected much of value to the institution. The daily analysis of milk supplied the institution has been continued, and the many chemical problems arising in this work are given a ready solution.

The excellent results obtained in our Maternity Service repeats itself in the year that has passed. The Colored Service again exceeds the white, having had 124 deliveries, and it, too, still contributes the death rate that is represented in great part by the moribund admissions. In the White Service 101 deliveries occurred and there were no deaths. A total of 233 children were born and includes five cases of twins, one case of triplets and a bicephalic child. The total death rate was a trifle over one per cent. Whilst the care of these patients is modern in

every detail, the segregation of the service by modern building provision would exhibit an assurance of greater tenderness for respectful motherhood.

Renovation to the requirements of asepticism and perfecting cleanliness was instituted in the Richard Milliken Memorial by the kind donor, and its completion has contributed an additional warmth of welcome to the little ones that are confided to its excellent provision. The manifest interest of its donor in the work of this splendid charity is comforting.

The Memorial Wards, in the name of Mrs. Julie Ziegler, have served well the spirit of intention.

Replenishing of department facilities included in the year's outlay secured a modern equipment for the Department of Eye, Ear, Nose and Throat, Amphitheatre and surgical supplies and improved X-ray and ward paraphernalia.

Through the kindness of the Jesuit Fathers the yard space has been improved and embellished by a beautiful and historic fountain, adding pleasure and happy inspiration to our convalescents.

It is pertinent to again call attention to the need of the Kitchen and Administration buildings previously mentioned. Many of the designs for special facilities await their erection.

The special hospital care of consumptives, apart from other diseases, would be furthered by the space thus acquired and the problem for separation of the colored patients would find solution.

The merit of the year's accomplishments bespeaks a vigor of new life that has been infused by a benevolence, which fulfills most fittingly the requirements of this broad charity.

The departments have been judiciously directed and satisfactory in result.

The duty involved in all that represents cleanly appointment and housekeeping, diet kitchen and supervision of patients,

division nurse superintendency and direction of surgical preparation, is creditable to the Sisters of Charity, and in value and appreciation very gratefully acknowledge.

My assistants, Drs. E. D. Fenner and J. M. Batchelor, have efficiently aided in the work of the year.

Valuable aid has been given by the Visiting Staff and their manifest interest in the work enlist our gratitude and praise.

The engineering and mechanical work, directed by our competent Engineer, Mr. John Ponder, deserves your commendation.

Our Clerk, Mr. Jas. R. Leake, has exercised care and precision in the duties of his office.

The favorable showing in every department—of a full service, the high plane of work, improved facility and latitude for progress, imply improvements replete by your wisdom, and calculable to a hospital pride in its service for charity.

Respectfully submitted,

J. D. BLOOM,

HOUSE SURGEON.

## Pathological Department.

CHARITY HOSPITAL,
STATE OF LOUISIANA.
NEW ORLEANS, February 3, 1902.

To the Board of Administrators:

Gentlemen—I beg to submit the following report of work done in the Pathological Department during the year 1901. This includes the experimental investigations and the usual routine work.

The experimental investigations include experiments as to the cause of pemphigus, the cause of cancer, and most of the laboratory work done in connection with the investigation of the relation of the mosquito to disease.

The experiments with pemphigus were made to establish, if possible, the already described diplococus, as the cause of the disease. After inoculating several pigs, which were not affected, we had to discontinue our examination from lack of material, as our cultures had died.

With cancer we were more successful. This investigation was a sequel of four experiments made in the department two years ago, when we had succeeded in producing gradual and progressive emaciation in four animals. This year our inoculation of cancer juice produced the same characteristic emaciation, and at the autopsy small nodules resembling cancer, were found in the liver of the animal. The length of time that the animal lived, seven months, and other pressing work that we had to do, prevented any further experiments this year.

The most important investigation done in the department was the laboratory work made in connection with the relation of the mosquito to disease. This included animal experiments, the breeding and infection of mosquitoes, the cultivation of infecting cultures and the recovery of these same cultures from the dead animals, and the making of all the photographs used to illustrate the report. By this work the department assisted in establishing the fact that bacteria can be transmitted by mosquitoes. Also that the life cycle of the plasmodia was demonstrated for the first time in America.

Following is the routine work done in the department during the year:

I have given the usual report of specimens examined, also a tabulated form where the whole year's work is given and at the same time the work of each month can be seen.

Associated with this routine work was the bacteriological examination of suture and dressing material, the bacteriological examination of the water, hot and cold, used in the Amphitheatre. These examinations proved the suture and dressings and the water to be sterile. Examination of the cistern water was also made for the typhoid bacillus, and the water was found free from this organism.

In concluding this report, gentlemen, I wish to commend the valuable assistance given me by Dr. M. Couret, Assistant Pathologist, also the aid given the department by the several Resident Students detailed to the department during the year. I wish, also, to thank our House Surgeon, Dr. J. D. Bloom, for facilitating our work and enhancing the value of the department.

Respectfully submitted,

O. L. POTHIER, M. D., PATHOLOGIST.

# Report of Directress.

CHARITY HOSPITAL, STATE OF LOUISIANA, NEW ORLEANS, December 11, 1901.

Dr. E. S. Lewis and Dr. Geo. S. Bel, Members of the Medical Committee of the Charity Hospital, Board of Administrators:

Gentlemen—A reckoning upon the results of seven years of practical work in the selection of candidates, organization of class work, maintenance of discipline and proper guidance has an especial, pertinent meaning for the fitness of a scale of work that through a generous benefaction is to follow in its wake.

In the kindly disposition of such provision, utility and fitting merit will insure the ends of a limitless charity and educational results.

The nursing institutions throughout our States are recognized educational centres that apply the seal of approval upon a distinctive individuality, and that implies the virtue of an honorable fitness. This plane of endeavor gives pride to an alumnus with whom must weigh its significance in vying effort to maintain and uphold. A school's directorate in the policy of justice and conscience has naught in the ends of its methods than meritorious results. And whatever in explanation that is said gives a greater force to the confidence that such standard can alone secure.

In humble purpose the roadway is wide, but individuality is lost. The closing of the seventh annual session of our school permits the exhibition of statistical data that shows its growing strength and recognized standing.

The list of applications received numbered 381, and exceeds every previous year. Of this number thirty-one were accepted.

The school has at the present time accommodation for forty pupils. During the year's course nineteen were withdrawn, thirteen as unsuited for the work, and six by resignation. The session of 1902 will open with a senior class of seventeen and a junior class of nineteen pupil nurses. With the approval of the Faculty of Lecturers the senior class of eleven in number await your favor for their diplomas. I have nothing but the kindest wishes for their careers, and ask God's blessing upon their work. The teaching corps and my associates have eagerly rivaled in efforts to perfect the educational advantages and profit every opportunity for instruction.

The provision for practical teaching in invalid cooking is to be further amplified in the building now in course of construction, and the usual course has supplemented the teaching during the session just closed. Massage instruction and practical demonstration have become part of the curriculum under the excellent tutelage of Miss L. Wooden.

The daily detail of duty has, with care and discretion, been made the essential in training, and the conscientious service of our Superintendent, Miss A. F. Huyghe, evokes my pleasure and special commendation. The regular apportioned time for the didactic course arranged for by our excellent Faculty of Lecturers has received the usual attention and diligent effort of each member and of which I desire to make a grateful mention. The initiative taken by your Board in the special building provision for the betterment of this department of hospital service, and that has been so handsomely superseded by the generous unknown donor, whose benefaction it would be our pride to associate with a distinguishable public memorial, represents a spirit of work in accord with your Board's progressive administration and the modest tribute of a philanthropic citizen. The honor of again addressing you weighs with my pleasure of giving expression to my appreciation of the valuable services of our estimable House Surgeon, Dr. J. D. Bloom and his Assistants, Drs. E. D.

Fenner and J. M. Batchelor. In the completion of the facilities of this auxiliary to our service, that in its scope will equal all future demands, we have anticipation and hope that the liberal earnestness of this charity will inspire further substantial and wise benevolence.

With the assurance of my appreciation of your helpful aid, this report is respectfully submitted.

> SISTER AGNES, DIRECTRESS.

# Report of the Chairman of the Faculty.

CHARITY HOSPITAL,
STATE OF LOUISIANA,
NEW ORLEANS, December 11, 1901.

Drs. E. S. Lewis and Geo. S. Bel, Members of the Medical Committee of the Charity Hospital Board of Administrators:

Gentlemen—By virtue of the duty imposed in the work of instruction to the design of intelligent sympathy and humane service, I have the honor of bespeaking on the part of my co-workers the value of the compliment implied, and to assure your honorable Board of their pleasure in the work.

The widening of the School's field for usefulness, made feasible by the substantial aid of an unknown benefactor, is pleasing, and confirms the promise of the fullest benefits of the service.

The large list of applicants, the medical efficiency and exemplary hospital service, richly endow this Nursing School with the best facilities for a thoroughness in the highest educational aim.

The session just closed has been made a source of pride to the members of this Faculty by the endowment of the School and that will equip this public charity with a nursing facility for all times, exalting to the memorial and to the service. The repose of public confidence in the credentials of this institution, a spur to greater unity and concert of action between Graduates and Alma Mater, will yield a harvest of good and prove a triumph in a State pride and a benevolent people.

The Senior Class, comprising

Miss CELINA BALDWIN......Alabama,

Miss ZOE BLAIR......Missouri,

Miss :	MARGARET GOMEZ	Alabama,
Miss	GRACE HAMMETT	Mississippi,
Miss	GRACIE B. KELLY	Louisiana,
MISS :	EFFIE McKEE	Louisiana,
Miss :	EMMA PETER	Florida,
Miss	OLIVE REDDY	Louisiana,
Miss	FANNIE ROBERTS	Texas,
MRS.	MARY ROBERTS	Texas,
Miss	ELDORA K. WHEELER	Louisiana,
having	g complied with all rules and regula	tions and having passed
satisfa	actorily the required examinations,	are presented to you for
their	deserved medals and diplomas.	Their School record
invite	s approval and their names are ar	honor to our registry.
	Respectfully submitted,	

J. D. BLOOM, M. D., CHAIRMAN OF FACULTY.
